

EnhancedClean Pathogen Control for Occupant and Building Wellness

A holistic approach to creating healthier buildings

There is a heightened sense of scrutiny for demonstrating that you are doing your part to provide clean, healthy, and safe environments. As your facilities return to normal occupancy levels, providing peace of mind is vital. ABM is uniquely positioned to help our clients prevent the spread of pathogens through a three-step approach to building disinfection.

Beyond maintaining cleanliness, ABM's EnhancedClean programme can help you assure occupants that you are doing your part to create healthier spaces – whether it is upon reopening comprehensively, disinfecting more frequently, or looking at the health of your building more holistically with advanced technologies.

ENHANCEDClean

Determining the Right Approach at the Right Time

Every building is unique, but what all facilities have in common is the ongoing need for preventative practices and regular disinfection to improve the health and wellness of the building and its occupants.

We can help you meet the evolving challenges of reentry and ongoing facility services, supplemented by broad disinfection technologies to cover every angle of building wellness.

	Suggested Frequency	Methods Employed	Team Members Deployed	Potential Supplies and Equipment	Other Features and Benefits
Step 1: Reenter Safely to build trust that it is safe to return to work	Intervals based on re-entry	<ul style="list-style-type: none"> Pre-opening site assessment(s) Plan return to work strategy Follow reopening checklist and reentry guide Workforce protocols (i.e. PPE & social distancing procedures) Implement preventative products strategy Enhanced clean using HSE-registered disinfectants 	Certified disinfection specialists	<ul style="list-style-type: none"> No touch fixtures, dispensers & door openers Centralized rubbish bins Sensor technologies Hand-sanitising stations (based on availability) Disinfecting wipes for occupants (based on availability) 	
Step 2: Enhance Daily to instil confidence that a recurring disinfection programme will contribute to a safer environment for occupants	Intervals range from hourly to daily to help curb the spread of pathogens	<ul style="list-style-type: none"> Site-specific SOW for each facility type based on occupancy levels Disinfection of all high touch point areas in facility 	Certified disinfection specialists	<ul style="list-style-type: none"> Occupant Communication Kits HSE-registered disinfectants Proper PPE Microfibre programme 	Improved frequency, visibility, and efficacy of cleaning programme through increased staff and scope
Step 3: Routinely Reinforce with a certified, more thorough disinfection process to help occupants feel confident that their environment is not only healthier day to day, but reset to even higher standards	Intervals range from nightly to quarterly based on business needs	<ul style="list-style-type: none"> Full building/large area disinfection with stronger disinfectants Certified operational procedures guided by our advisory council, which includes internal and external infection prevention experts 	Certified disinfection specialists	<ul style="list-style-type: none"> Electrostatic sprayers HSE-registered disinfectants with faster kill time and broader pathogen spectrum <p>Continued product testing:</p> <ul style="list-style-type: none"> Testing and validation UV devices and UVC lighting Antimicrobial and environmental coating solutions Robotic disinfection 	Broader scope of disinfection
