

We Are Here for You

There has never been a more critical time to assess how effectively your facility is maintained and managed

Ensuring a safe, disinfected, and healthy environment is what we do every day in your healthcare facilities.

We understand the urgent situation hospitals and healthcare facilities face with daily updates and revised requirements. We are ready to provide the necessary solutions to address each of your support services needs. We use proven service delivery methods and procedures within each functional area to deliver the safest possible environment. Our healthcare support services are instrumental for our partners during this crucial time. As you assess your facility's needs, ABM is ready to help provide a safe, clean, and quality service environment for your patients, residents, visitors, caregivers and staff.

ABM is successfully delivering critical solutions to our healthcare partners by ensuring:

- Rapidly evolving healthcare regulations and guidelines are implemented
- The latest directives for ultimate safety and support are communicated daily
- Additional staff is provided to help balance the abundance of incoming patient-volume, required cleaning frequencies, and portage services, leveraging economies-of-scale to deliver and ensure crucial supplies
- Medical staff throughout the country is receiving maximum protection and support.

The safety of our team members and clients has been, and continues to be, our primary concern.

We Understand These Trying Times

Based on updated guidance from industry regulators and government advice, we have an updated SOP/work instructions document related to the cleaning and maintaining of the healthcare sites for COVID-19. Our focus is on maintaining a safe and healthy environment while you provide the best care for your patients.
