

JOB DESCRIPTION

JOB TITLE: Fabric Engineer

LOCATION: Drake Circus, Plymouth

REPORTING TO: Site Manager

OUR VALUES AND BEHAVIOURS

Respect - This means respecting each other, great communication, valuing contributions, respecting differences and supporting one another.

Collaboration - This is all about teamwork and remembering that we are all working towards the same goal. It's also about how we work with our clients and their other suppliers. We are one team!

Integrity - This is about being honest, reliable and trustworthy and always delivering on promises.

Innovation - This is about striving to always improve, working smarter, coming up with new ideas and having the confidence to share them. At the same time it's about embracing change.

Excellence - This is all about striving to be the very best brand ambassador, exceeding expectations to build value and give us and our clients a real competitive advantage.

Trust - This is all about being consistent, organised and reliable. It's also about doing what you say you are going to do and not promising what you can't deliver.

OVERVIEW OF JOB DESCRIPTION

Main Duties & Responsibilities:

This role is for hands on working fabric Engineer with a good understanding of general building services and estate management. The purpose of the role is to assist the Technical Services team in the provision of Hard FM & Lifecycle Services whilst delivering a high-quality and statutory compliant maintenance service. The role will include assisting in the operation, repair and maintenance of Building, Fabric repairs to fire doors, flooring and painting and decorating.

- Ensure that routine fabric maintenance is carried out to meet and exceed expectations and agreed service level agreements.

- The Fabric Technician will be required to carry out all moves and changes that the client requires to be carried out.
- Undertake painting, decorating, and a full range of DIY tasks to ensure the meeting of service levels and to maintain an attractive decorative environment.
- Ensure the loading and unloading of stock, and appropriate and safe storage of relevant equipment, spares and deliveries.
- Ensure effective lamping replacement is undertaken for all bulbs and tubes, and cleaning of lighting diffusers in line with ABM electrical safety rules and LOTO process.

- Assist the ABM engineering team to ensure that all planned and reactive engineering activities meet and exceed both service levels and customer expectations.
- Ensure that all relevant paperwork is completed regarding PPM, reactive and breakdown works and that it is passed without delay to the contract administrator.
- Assist the Water Treatment Engineer in in the compilation of the Water Management System logbooks, as directed by site management.
- Ensure that Method Statements and Risk Assessments are prepared ready for Supervisor / Service Delivery management sign off and used for all tasks undertaken to ensure safe working practices always.
- Ensure, where applicable, that comprehensive maintenance records are kept.
- To undertake lone working when and where required, subject to passing satisfactory training
- To develop a good working relationship with all members of ABM subcontractors and client's staff.
- Ensure the provision of a safe & healthy working environment is met, including the wearing of uniform and appropriate PPE always. To ensure compliance with all company and client policies and procedures, as well as client site policies, procedures and working arrangements, as required.
- Ensure a professional image of ABM and the client is presented to clients and visitors and ensure excellence in customer service is delivered and promoted always.
- Ensure that fabric and engineering skills are maintained through a commitment to personal development and life-long-learning.
- Ensure that Fabric Technician and the client storage area is maintained and kept safe and tidy.
- Assist when requested with routine daily and weekly plant checks as detailed in the site log books.
- Ensure the equipment storage areas in the facility are kept clean and tidy daily.
- Escort visiting subcontractors around site to ensure safe execution of service-related tasks, and ensure RAMS
- are reviewed by the engineering teams and contract management according to company and client protocols.
- Ensure the plant rooms under the responsibility of the Handyman are locked always and kept in a clean and tidy condition.
- To Ensure tasks as directed are completed with the appropriate H&S awareness and implementation.
- Ensure the provision of a Safe and Healthy working environment. To include the wearing of uniform and PPE
- always.
- Any other task as directed by the site management team.
- Ensure the engineering team on site produce required near miss reports, dynamic risk assessments and detailed records of site activities, and ensuring any noncompliance is challenged and escalated where necessary.
